Product Information:

Check the type of product container to be check weighed:

- Bag/Pouch
 Box/Carton
 Pail/Keg/Drum
 Bottle
 Tube
 Can Closed
 Can Open
 Tray Closed
 Tray Open
 Packet

Describe each of your products below. Make sure to list the Shortest and Longest unit length, and the units of measure (in, mm, lb, Kg, etc)

Item Description	Length	Width	Height	Weight Tare Weight	Rate Products per Minute	Speed Meters per Minute	Accuracy (Required)
				/			
				/			
				/			

What **Direction** is the Product flow, please **Circle** the required position for the controls ?

What is the **Spacing** between products (leading edge to next leading edge) _____

What is the **Conveyor Speed** of your current/new production line ? _____

What is the maximum **Production Rate** for your **Longest** package ? _____

What is the maximum **Production Rate** for your **Shortest** package ? _____

How is the **Product placed** on the In-feed conveyor ? _____

- Product Condition:**
- | | |
|------------------------------------|--|
| <input type="checkbox"/> Closed | <input type="checkbox"/> Open (Indicate flaps on Sketch) |
| <input type="checkbox"/> Frozen | <input type="checkbox"/> Un-Frozen |
| <input type="checkbox"/> Supported | <input type="checkbox"/> Un-Supported |
| <input type="checkbox"/> Wet | <input type="checkbox"/> Dry |

Environmental Information:

The Dolphin AD4404 and AD4820 Checkweighers are provided with an IP65 Oriental motors, stainless steel 304 frames and IP65 Checkweigher controller. The optional intermediate conveyor, belt conveyor and chain conveyor are provided in stainless steel, food grade compliant systems with wash down motors and belts. Options are available for Wet, Corrosive and Hazardous locations. Please note your specific requirements below:

- IP54 / Nema 12 (Standard System) IP65 / Nema 13 (Wash down/Dust Tight)
 Exi/d / Nema 7/9 (Explosion Proof) IP66 / Nema 4X (Wash down/Corrosion Resistant)

For **YOUR** application please specify the finish or material required and explain the environment where the Checkweigher will be used. Also explain the wash down requirements, i.e., what chemicals, high pressure water, steam, caustic or acidic solutions etc, will be used.:

For Hazardous Environments applications, please specify area classifications:

Class : _____ Zone : _____ Group : _____ Division : _____

Temperature Range : _____ ° to _____ ° (Celsius Fahrenheit)

Humidity Range : _____ % to _____ %

Auto Ignition Temperature : _____ °

Electrical Specifications:

The Dolphin AD4404 and AD4820 Checkweighers are provided with 240 50Hz motors. The Checkweigher controller has connections for 240VAC 50Hz power supply. Other voltages are available. Please specify below your requirements:

- Standard 240VAC, 50Hz – Controller
 Standard 240/480 3-Phase, 50Hz – Conveyor
 110VAC, 60Hz - Controller
 110VAC, Single Phase 60Hz – Conveyor
 220VAC, 60Hz - Controller
 220VAC, Single Phase 60Hz – Conveyor
 Other: _____ VAC: _____ Phase: _____

Mechanical Specifications:

The Dolphin AD4404 and AD4820 Checkweighers can be provided with a wide range of conveyor configurations to meet your specific application, depending upon maximum product length, conveyor speed, and production rate. Below are a variety of conveyor choices.

The Dolphin AD4404 and AD4820 Checkweighers In-Feed and Weigh conveyors have a maximum height of 900mm to the top of the belts, with adjustable feet allowing 50mm +/- adjustment. Support stands are available if required starting from 100mm to 500mm.

- Support stand – Please specify height: _____ mm.
- Wheels under stand – (One set Only)
- Up-right bag guides for open-mouth bags
- Product Speed Control Conveyor
- Product Spacing or Pacing conveyor

Please Note: Our conveyor lengths and maximum production rates are based upon a leading edge to leading edge distance between products equal to the Checkweigher Weigh Conveyor plus 50mm or greater. If distances are less than this minimum, a pacing conveyor will be required to meter products across the Checkweigher.

NOTES : _____

Sample Picture Only

NOTES: The Checkweigher is required to be installed with **NO** exposure to floor Vibrations.
 The Checkweigher is required to be installed with **NO** exposure to Wind/Breezes.

Reject Conveyor Options:

A&D Mercury Pty Ltd offer a variety of reject devices to remove over and under specification products from the production line conveyor system. Please choose the type of reject device best suited for your application.

- Air Blast – Single Rejection “HiHi, Hi, Lo, or LoLo”.
- Air Blast – Dual Rejection “HiHi, Hi” and “Lo, LoLo”.
- Drop Conveyor – 200mm in length, minimum line height of 100mm.
- Pneumatic Diverter – Single Selection Reject “HiHi, Hi, Lo, or LoLo”.
- Pneumatic Diverter – Dual Selection Reject “HiHi, Hi” and “Lo, LoLo”.
- Alarm Reject – Flashing Light to alert operator.
- Alarm Reject – Siren to alert operator.
- On-Site Clean Filtered Air Supply.
